Peter,
Do we know what the ramification of this would be for Drinking Water systems?

Subject: Near term action on cross-federal communication - PFAS ATSDR Toxicological Profile to be released for final public comment

Tom and Lawrence:

ATSDR (Henry Abadin and Janine Cory) has reached out to me to begin cross-Agency coordination on communications related to the pending release of their draft Toxicological Profile for PFAS for public comment.

The process for the document is as follows:

- 1) a non-public letter peer review (recently completed)
- 2) internal ATSDR clearance (currently ongoing)
- 3) **public release for a final 60 day comment period (anticipated release in November)**
- 4) final posting – TBD/spring 2018

You may recall that the document includes derivation of minimal risk levels (MRLs) for 4 PFAS (PFOA, PFOS, PFHxS, PFNA) that are ATSDR's "equivalent" to EPA's reference doses (RfDs).

Deliberative Process / Ex. 5

Note also that ATSDR is the first federal agency to derive toxicity values for PFAS other than PFOA and PFOS. All 4 PFAS are frequently found at sites of interest to EPA as you know.

As the public release of this draft final document is expected to be a communication issue for multiple program and regional offices, I am forwarding the request to you.

Kathleen and I would greatly appreciate being apprised of next steps as you move forward. Our PFAS toxicity workgroup is ready to help craft Qs & As.

ATSDR is expecting to hear from EPA as soon as possible.

Here is the contact information for ATSDR's communication liaison for PFAS:

Janine Cory, MPH
